Pixel Film Studios' new plugin, FCPX Text Animator, breathes new life into any text on screen

By L. Silver  
Nov. 6, 2020

Aliso Viejo, California — Pixel Film Studios presents an all in one text animation plugin, the [FCPX Text Animator](#), now available on the [company's store](#). This collection of professional text animation tools features over 500 text animation presets, with thousands of customization

possibilities. Free and frequent updates will be available to any users who own the plugin, including the latest October update, which added dynamic Through animations to the growing library.

“The [FCPX Text Animator](#) is a must-have in any video creator’s library,” said Lynn Silver, Media Manager of Pixel Film Studios. “With this impressive collection of animation tools, creators can create dynamic titles and advertisements, add context to scenes, and bring attention to details in a compelling way.”

### **Compatible with Any Language or Font**

FCPX Text Animator will add energy to any text in Final Cut Pro X, in any language. Animate text in one language, then translate the text into other languages to spread your content across the globe. And with the ability to use any font or text color, there are limitless possibilities for text animation.

### **Several Categories and Endless Customizability**

The FCPX Text Animator includes several categories of animations, including Stomp, Bounce, Rotate, Smooth, and more. Each one contains dozens of crisp text animations that users can choose from and customize. In the inspector, use the animation controls to control whether the animation plays by line, character, or word. Adjust the anchor point to change where the animation starts and ends.

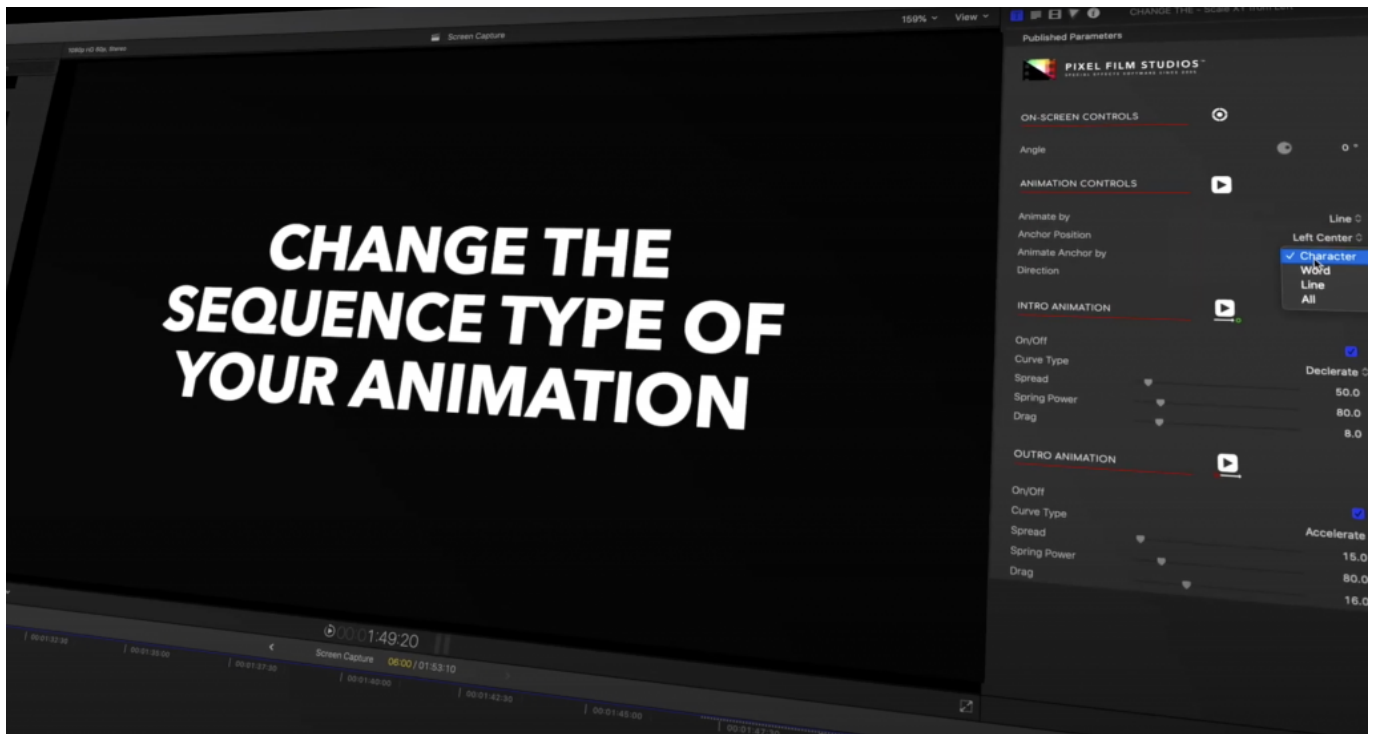

Choose to animate text into the scene, out of the scene, or both. With separate controls for intro and outro animation, users can stylize text to fit their brand or project.

With the FCPX Text Animator, users can animate any text, regardless of the font, color, or language.

### **Makes Text Animation Effortless - No Keyframes Necessary**

To use the plugin, creators will simply need to open their Titles category, and drag the desired animation above their media in the timeline. In the text inspector, they'll type in their text, and modify the scale, font, and any other text settings. Once done, they'll switch to the Title inspector controls, and customize the animation to perfection. Finally, on screen controls allow users to adjust the angle of the animation.

Users have the ability to customize the in and out animations separately, or change things such as the angle and direction of the animation

## Free Future Updates

The [FCPX Text Animator](#) will continue to grow with future updates.

At a fixed price of \$29.95, FCPX Text Animator is available now at [pixelfilmstudios.com](http://pixelfilmstudios.com). Additional product information, including system requirements, can be found on the product page [here](#).
