

Track text, logos, videos and animations to specific subjects in your footage with Auto Tracker!

By D. Austin
Dec. 6th, 2019

The FCPX Auto-Tracker is a motion tracking tool created exclusively for Final Cut Pro X. Easily track text, pictures, logos, videos, and animations to subjects in footage with a single click. The Auto-Tracker's technology gives users the ability to achieve fast and accurate tracks without having to set a single keyframe. Track forward, track backward, and track

multiple objects in a single scene. FCPX Auto-Tracker is a Final Cut Pro X exclusive plugin.

The FCPX Auto-Tracker makes tracking text, pictures, videos, and animations to subjects an absolute breeze with motion tracking technology. Simply apply a tracker preset to your footage, select an area, and track! Completely bypass the the tediousness of manual key-framing with automatic tracking from Pixel Film Studios.

The FCPX Auto-Tracker allows users to patch-up imperfect tracks with simple controls. Utilize the hot-key “Option” + Click to delete unwanted points. Editors can delete a single track point or many track points at once. Lastly, Auto-Tracker users can add new points by scrolling through the timeline and moving the control point.

Place multiple instances of the Auto-Tracker on the same footage to track multiple objects onto different subjects in the same scene. Auto-Tracker’s interface makes precision motion tracking quick and easy so that you spend cut editing time and achieve amazing results.

The FCPX Auto-Tracker features the ability to track rotation and scale, allowing editors to create the illusion of tracking in 3D space. This feature works best when a subject is moving directly toward the camera. With built in smoothing options, editors can smooth out scale and rotation tracking data with a single click.
